

HPC for non-IT users

NCC Montenegro is supported by EuroCC 2 and EuroCC4SEE projects. EuroCC 2 and EuroCC4SEE have received funding from the European High-Performance Computing Joint Undertaking (JU) under grant agreements No 101101903 and No 101191697. The JU receives support from the European Union's Digital Europe Programme and Germany, Bulgaria, Austria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Greece, Hungary, Ireland, Italy, Lithuania, Latvia, Poland, Portugal, Romania, Slovenia, Spain, Sweden, France, Netherlands, Belgium, Luxembourg, Slovakia, Norway, Türkiye, Republic of North Macedonia, Iceland, Montenegro, Serbia, Bosnia and Herzegovina.

Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union - European High-Performance Computing Joint Undertaking (JU). Neither the European Union nor the granting authority can be held responsible for them.

Training workshop for companies that want to innovate and grow with

HPC and AI

Short Course Description

Introduction to Supercomputing is a short non-technical course designed to provide beginners with foundational knowledge in High-Performance Computing (HPC), answering key questions: WHAT, WHY and HOW to use Supercomputers.

Over the span of 2 hours, participants will understand basic technical and commercial aspects of HPC systems/applications, explore HPC opportunities and benefits through industry use cases and success stories, learn how to assess HPC readiness and learn how to access European supercomputers (for free). The course is tailored for industry professionals, who are new to HPC and who seek advanced computational solutions and intelligent algorithms to elevate their work and businesses.

By the end of the course, participants will be equipped with the knowledge and skills to confidently engage with HPC systems and apply them to their industry fields, business workflows and innovation strategies.
